Andrea Gatti was born, lives and works in Turin, Italy. After studying at the European Institute of Design, began his career as illustrator.

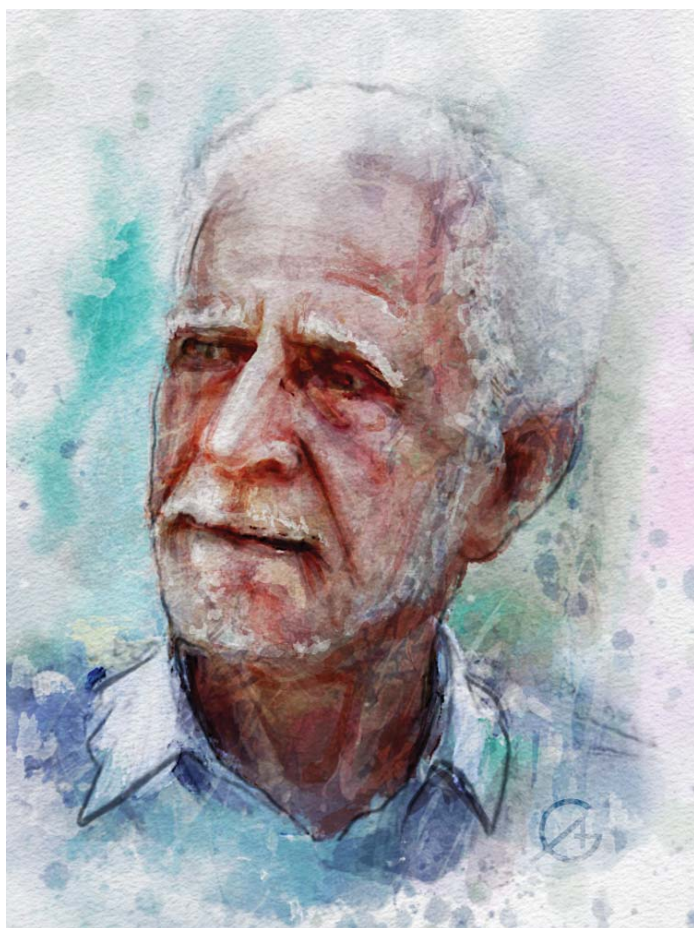

His creativity is essentially characterized by a mixed media iperealistic figurative works, focusing on the detail, and watercolor images built on the sign.

Soon it becomes clear that these elements are cornerstones in defining his aesthetic sense, two directions along which he develops his drawing and painting style.

But it is only with the advent of suitable mastery of digital techniques, that these two ways are combined, giving rise to its more mature production, made of full and layered images, rich and powerful, balancing between the care of the detail and the pictorial style, but always with the goal to involve and amaze.
